What this standard covers

This standard specifies the line length, width and width difference, flatness deviation, working edge straightness deviation, indication deviation, shape hole position positioning line deviation, indexing deviation, scale line firmness, and reliability of the plotter ruler drawing template. Requirements for the limits of migration elements, edges, tips, and appearance quality describe the corresponding test methods, stipulate inspection rules, marking, packaging, transportation and storage content, and give product classifications that facilitate technical regulations. This standard applies to the design, production, inspection and sales of synthetic resin drawing templates.

Document data

International classification (ICS): 01.100.40.

Chinese classification (CCS): Y50.

Estimated length of the Chinese original: 11,131 words.
