What this standard covers

This Standard specifies a still water and mud after a certain period of time sufficiently stirred to be used each time to calculate the mud outflow 100mL relative viscosity, the relative fluidity and thixotropic methods and requirements. This Standard applies to the ceramic slurry relative viscosity, measured relative fluidity and thixotropic.

Document data

International classification (ICS): 81.060.01.

Chinese classification (CCS): Y20.

Estimated length of the Chinese original: 5,546 words.

Supersedes the earlier edition QB/T 1545-1992.
