What this standard covers

This standard specifies the requirements of welding parts, welding parts, test methods and inspection rules for light industrial machinery products. This standard applies to light-weight mechanical welding parts made of carbon structural steel, low-alloy structural steel, stainless steel, non-ferrous metal and alloy materials, which are manufactured by means of arc welding, resistance welding and brazing. Other welding materials and welding methods can refer to the implementation. This standard does not apply to pressure vessel products.

Document data

International classification (ICS): 25.160.

Chinese classification (CCS): Y90.

Estimated length of the Chinese original: 10,168 words.

Supersedes the earlier edition QB/T 1588.1-1992.
