What this standard covers

This standard specifies the scope, product classification, requirements, inspection rules and markings, packaging, transportation and storage of steam irons for the garment machinery industry, describes the corresponding test methods, and defines relevant terms and definitions. This standard applies to the design, production, inspection and sales of steam irons used in industrial sectors or in commercial service locations. This standard does not take into account the special risks that exist in nurseries and other places where children and young people are present, or where the elderly and infirm are left unattended. This standard does not apply to: dry-type electric irons and wet-type (steam) electric irons for household and similar purposes.) Electric irons; Electric irons used in vehicles, cabins and aircraft; Electric irons used in tropical countries; In places with special conditions such as the presence of corrosive or explosive gases (dust, steam or gas), etc.
