What this standard covers

This standard specifies the technical requirements for the performance, safety and environmental protection, main components, assembly quality, appearance, etc. of the through-type water extruder. It describes the model preparation method and corresponding test methods, etc., and stipulates the inspection rules, marking, packaging, transportation and storage, etc., and also provides product composition, basic parameters and product classification to facilitate technical regulations. This standard applies to the production, inspection and sales of through-type water extruders with a working width of 1200mm ~ 3400mm.

Document data

International classification (ICS): 59.140.40.

Chinese classification (CCS): Y94.

Estimated length of the Chinese original: 12,151 words.
