### What this standard covers

This standard specifies the technical requirements for centrifugal sanitary pumps, including materials and hygiene, structure and components, appearance and processing, and performance. It describes the corresponding test methods, specifies the inspection rules, marking, packaging, transportation, and storage, and provides the types, models, basic parameters, and operating conditions for ease of technical specification. It also defines relevant terminology. This document applies to the design, production, inspection, and sales of various liquid transfer pumps in the dairy, beer, and beverage processing industries. It can be used as a reference for the design, production, inspection, and sales of various liquid transfer pumps in the pharmaceutical, bioengineering, and fine chemical industries.

### Document data

International classification (ICS): 23.080.

Chinese classification (CCS): X90.

Estimated length of the Chinese original: 9,916 words.

Supersedes the earlier edition QB/T 1826-2010.
