What this standard covers

This standard specifies the requirements for the accuracy, special components, strength, surface coating, appearance, etc. of bicycle frames, describes testing equipment and instruments and corresponding test methods, and specifies inspection rules, markings, packaging, transportation and storage contents. It also provides product classification, matching dimensions and model preparation methods that facilitate technical regulations. This standard applies to the design, production, inspection and sales of bicycles, electric-assisted bicycles, and electric bicycle frames. Other special-purpose bicycle frames may refer to this standard.

Document data
