Foreword

QB/T 1947.1-2026 is a recommended industry standard of the People's Republic of China in the Light Industry sector, approved and issued by the Ministry of Industry and Information Technology on 13 February 2026, with effect from 1 September 2026.

This edition replaces QB/T 1947.1-2012.

Classification: ICS 97.200.20; CCS Y58.

1 Scope

QB/T 1947.1-2026 sets out general technical requirements for national blowing instruments, the wind instruments of Chinese folk music. As the first part of the QB/T 1947 series, it covers what is common to this family of instruments, while individual instruments are dealt with in the other parts of the series. The document gives the shared technical basis on which such instruments are made, supplied and judged.

Makers of Chinese wind instruments, music shops and distributors, testing bodies, buyers and schools or ensembles that purchase instruments can use it when agreeing on what a satisfactory instrument is. It is a voluntary industry standard (code with /T), approved by the Ministry of Industry and Information Technology. It was issued on 13 February 2026 and takes effect on 1 September 2026. It replaces QB/T 1947.1-2012.
