What this standard covers

This standard specifies the monitoring and calculation methods for thermal performance indicators of daily-use ceramic color-baking roller kilns. This standard applies to the monitoring and calculation of the thermal performance indicators of the roller kiln using gas fuel and electric energy during the color baking process of daily-use ceramic products. For the monitoring and calculation of thermal basic performance indicators of roller kilns for color-baking and other ceramic products, bisque-fired roller kilns, and glaze-fired roller kilns, this standard can also be referred to, and monitoring items can be added or deleted according to specific conditions.
