What this standard covers

This standard specifies the determination and calculation methods of heat balance and heat efficiency of household ceramic chain dryers. This standard applies to the determination and calculation of the heat balance and thermal efficiency of chain dryers for green body drying using kiln waste heat and external heating sources (gas fuel, electricity, etc.). , box or tunnel dryer heat balance, thermal efficiency measurement and calculation can also refer to or adopt this standard.

Document data

Chinese classification (CCS): Q94.

Estimated length of the Chinese original: 23,276 words.
