What this standard covers

This standard specifies the requirements for the material, hardness, cutting edge, opening and closing performance, surface quality, safety performance, drop, and accessories of electrician's knives, describes the corresponding test methods, specifies the inspection rules, marking, packaging, transportation and storage, and provides product classification and marking for easy technical regulations. This standard applies to the design, production, inspection and sales of electrician's knives used for cutting and cutting the insulation layer of wires in installation or maintenance engineering and other operations. This standard does not apply to electrician's knives for live working.
