What this standard covers

This standard specifies the model and model naming, type and working conditions of disc diatomite filters, specifies basic requirements, performance requirements, electrical safety, safety and health requirements, processing, manufacturing quality and assembly quality, describes the corresponding test methods, and specifies the inspection rules, marking, packaging, transportation and storage content. This standard applies to disc-shaped metal wire filters as filter elements and diatomite as filter media, which are used for clarification filtration of fermentation broth to remove yeast, and are also used for the design, production, inspection and sales of products for clarification filtration of similar fermentation broths (such as beverages, brewing, and chemicals).

Document data

International classification (ICS): 67.260.

Chinese classification (CCS): X99.

Estimated length of the Chinese original: 11,142 words.
