What this standard covers

This standard specifies the materials, requirements, test methods, inspection rules, signs, packaging, transportation, storage and installation of shower rooms, describes the corresponding test methods, and defines related terms and definitions. This document is applicable to the design, production, inspection, sale and installation of household and similar shower enclosures. Products with similar structures can be implemented by reference. This document is not intended for use in situations requiring special regulations (such as medical treatment). Note: "Similar use" in the document includes use in hotels, dormitories, other public bathrooms and similar buildings.
