What this standard covers

This standard specifies a method for the determination of total free alkali content in soap. This standard is applicable to ordinary soaps and laundry soaps, not to compound soaps, nor to samples containing additives (silicates, etc.) that will be decomposed by sulfuric acid according to the experimental procedures.

Document data

International classification (ICS): 71.100.40.

Chinese classification (CCS): Y43.

Estimated length of the Chinese original: 5,513 words.

Adopted international standard: ISO 684-1974, MOD.

Supersedes the earlier edition QB/T 2623.2-2003.
