Foreword

QB/T 2660-2026 is a recommended industry standard of the People's Republic of China in the Light Industry sector, approved and issued by the Ministry of Industry and Information Technology on 13 February 2026, with effect from 1 September 2026.

This edition replaces QB/T 2660-2004.

Classification: ICS 71.100.70; CCS Y42.

1 Scope

QB/T 2660-2026 is the industry standard for skin tonic, the liquid cosmetic product applied to the skin. It deals with this one cosmetic product and gives the technical basis on which it is made, supplied and judged. Other cosmetic products are outside its title.

Cosmetics manufacturers, brand owners, contract producers, testing laboratories, distributors and buyers can use it when agreeing on the quality of skin tonic products. It is a voluntary industry standard (code with /T), approved by the Ministry of Industry and Information Technology. It was issued on 13 February 2026 and takes effect on 1 September 2026. It replaces QB/T 2660-2004. The document is meant to give buyers and sellers one shared reference, so that a supply agreement or a quality check can point to a single published text instead of to each party's own practice.
