- This is the second revision.

1 Scope

This document establishes the basic principles of footwear product labeling; stipulates the content and marking requirements of footwear product labeling.

This document applies to the marking of footwear product labels, which are produced or sold within the territory of the People's Republic of China.

2 Normative references

The contents of the following documents constitute essential clauses of this document through normative references in the text. Among them, for dated references, only the version corresponding to that date applies to this document; for undated references, the latest version (including all amendments) applies to this document.

3 Terms and definitions

The terms and definitions as defined in GB/T 2703, as well as the following terms and definitions, apply to this document.

Footwear products made of various materials for children under 14 years old (inclusive) and infants.

The final production, processing or assembly location of the product.

The unique number marked on footwear products of different styles or batches.

4 Basic principles

4.1

All contents of product identification shall be concise, accurate, scientific, easy to understand.

4.2

Product identification shall truthfully introduce the product and reflect the true attributes of the product.

5.1.2 Product name

5.1.2.2

The names of other footwear products, other than children's footwear, shall at least consist of one of the three elements: gender of the user, final use, function.

5.1.3 Footwear size

Mark the Chinese footwear size according to GB/T 43293.

5.1.4 Material

5.1.4.1

At least the upper material shall be labeled; the materials of other parts may not be labeled.

5.1.4.2 The upper material shall be labeled in Chinese at least; it can be labeled with a graphic or English name abbreviation at the same time, with the Chinese labeling information prevailing. The compliance of the upper material labeled name can refer to the terminology standards of the relevant industry and meet the standardized Chinastandards.org management of the footwear industry. 5.1.4.3 When labeling the upper material, it is not appropriate to consider accessories or reinforcements, such as: trademarks, piping, decorations, shoelaces, shoelace buckles, shoe tongues, shoe eyelets or similar attachments. 5.1.4.4 The material labeled on the upper material shall account for at least 80% of the upper surface area. If no material reaches 80%, at least two main materials shall be labeled; the marking order shall be marked in order of their surface area.
