What this standard covers

This standard stipulates the technical requirements for assembly quality, performance, safety, appearance quality and other aspects of moist heat setting machines, describes the model preparation method and corresponding test methods, etc., and stipulates inspection rules, marking, packaging, transportation and storage, etc. At the same time, the product composition, basic parameters and product classifications for technical specification are given. This standard applies to the production, inspection and sales of wet heat setting machines that are used to eliminate internal stress in shoe uppers and shape them in shoemaking production.

Document data

International classification (ICS): 61.080.

Chinese classification (CCS): Y99.

Estimated length of the Chinese original: 9,964 words.
