Foreword

QB/T 2680-2026 is a recommended industry standard of the People's Republic of China in the Light Industry sector, approved and issued by the Ministry of Industry and Information Technology on 13 February 2026, with effect from 1 September 2026.

This edition replaces QB/T 2680-2004.

Classification: ICS 59.140.30; CCS Y46.

1 Scope

QB/T 2680-2026 is the industry standard for lining leather, the leather used for the inside of footwear. It deals with this one product and gives the technical basis on which shoe lining leather is made, supplied and judged. Leather for other uses is outside its title. The document is meant to give buyers and sellers one shared reference, so that a supply agreement or a quality check can point to a single published text instead of to each party's own practice.

Tanneries and leather producers, footwear manufacturers that buy lining leather, testing laboratories, traders and buyers can use it when agreeing on the quality of a delivery. It is a voluntary industry standard (code with /T), approved by the Ministry of Industry and Information Technology. It was issued on 13 February 2026 and takes effect on 1 September 2026. It replaces QB/T 2680-2004.
