What this standard covers

This standard specifies the dc or ac supplied electronic ballasts performance requirements. Power supply includes 50Hz/60Hz, 1000V AC or less. Such a converter is provided with ballast and stable triggering member, so that the converter can operate in the discharge lamp and the DC power source or a different frequency. Matching the ballast pressure mercury discharge lamp comprising, high pressure sodium and metal halide lamps. This standard does not include fluorescent and low pressure sodium lamp ballasts and motor vehicles, such as theaters and specialty lamp ballasts.

Document data

International classification (ICS): 29.140.90.

Chinese classification (CCS): K74.
