What this standard covers

This standard specifies the requirements, judgment rules, inspection rules, marking, packaging, transportation and storage of children's leather shoes, describes the corresponding test methods, defines relevant terms and definitions, and gives product classification. This standard applies to the design, production, inspection and sales of general children's leather shoes and infant leather shoes produced by processes such as gluing, sewing, molding, vulcanization, injection molding and perfusion, with natural leather, artificial leather and synthetic leather as the main upper surface. Children's leather shoes and infant leather shoes made with textiles or other materials as the upper surface and the same production process can be used as a reference.
