What this standard covers

This standard specifies the requirements for materials, combustion systems, performance, appearance quality, processing and assembly, mechanical safety and electrical safety of rice cookers. It describes the corresponding test methods, specifies inspection rules, marking, packaging, transportation and storage, provides type classification, basic parameters and working conditions for easy technical specification, and defines relevant terms. This document applies to the design, production, inspection and sale of rice cookers in central kitchens (factories, schools, hospitals, airports, industrial parks, fast food restaurants, etc.).

Document data

International classification (ICS): 67.260.

Chinese classification (CCS): X90.

Estimated length of the Chinese original: 11,137 words.

Supersedes the earlier edition QB/T 4027-2010.
