What this standard covers

This standard specifies the use of solar water heater thermostat mixing valve terminology, definitions, classification and labeling, requirements, test methods, inspection rules, signs, packaging, transport and storage. This standard applies to no more than nominal pressure 0.5MPa under conditions of use, the installation of solar water heaters in the facility, the water temperature is automatically controlled by a preselected temperature thermostatic valve. This standard also applies to storage-type gas water heater installed, on electric water heaters and other facilities, supporting the thermostatic valve can be used.

Document data

International classification (ICS): 91.060.

Chinese classification (CCS): Y71.

Estimated length of the Chinese original: 21,299 words.

Adopted international standard: ASSE 1016-2005, NEQ; ASSE 1070-2004, NEQ.
