What this standard covers

This standard specifies the sensory, physical and chemical requirements for non-water-soluble rust inhibitors used as additives in the sugar industry, describes the corresponding test methods, and specifies inspection rules and requirements for labeling, packaging, transportation, and storage. This standard is applicable to (non-ionic) non-water-soluble food additives using edible vegetable oils and food additives with film-forming, synergistic and antioxidant functions as raw materials for anti-rust and anti-corrosion maintenance of sugar-making equipment and containers during non-production periods. Production, inspection and sales of rust inhibitors.

Document data

International classification (ICS): 67.180.

Chinese classification (CCS): X30.

Estimated length of the Chinese original: 6,643 words.
