What this standard covers

This standard specifies the classification of monochromatic low-pressure sodium lamps, named, technical requirements, test methods, inspection rules, signs, packaging, transportation and storage requirements. This standard mainly in supporting physical optical instruments such as the polarimeter, refractometer, these instruments for the pharmaceutical, sugar, glass production and other industries, is also widely used in the fields of education, taught as a monochromatic light source spectrum.

Document data

International classification (ICS): 29.140.30.

Chinese classification (CCS): K71.

Estimated length of the Chinese original: 9,962 words.
