What this standard covers

This standard specifies the product classification, requirements, inspection rules, marking, packaging, transportation and storage of commercial electric water boilers, and describes the corresponding test methods. This standard applies to the design, production, inspection and sales of commercial electric water boilers with rated voltages not exceeding 250 V for single-phase appliances and 480 V for other appliances that are not exclusively for household use. Appliances utilizing other forms of energy, where applicable, have performance requirements also within the scope of this standard. This standard does not apply to: water boilers designed for industrial use; water boilers with electrode heaters; electric water boilers used under special conditions such as corrosive or explosive gases (dust, steam or combustible gas).

Document data

International classification (ICS): 97.100.

Chinese classification (CCS): X99.
