What this standard covers

This standard specifies the test conditions, instruments and equipment, test steps, total energy consumption calculation formula and test report preparation elements for determining the energy consumption of lockstitch sewing machines. This standard applies to the energy consumption test of computer-controlled lockstitch sewing machines with automatic thread trimming, automatic reinforcement seam and automatic counting seam functions.

Document data

International classification (ICS): 61.080.

Chinese classification (CCS): Y17.

Estimated length of the Chinese original: 7,719 words.
