Foreword

QB/T 4465-2026 is a recommended industry standard of the People's Republic of China in the Light Industry sector, approved and issued by the Ministry of Industry and Information Technology on 13 February 2026, with effect from 1 September 2026.

This edition replaces QB/T 4465-2013.

Classification: ICS 97.140; CCS Y82.

1 Scope

QB/T 4465-2026 sets out general technical requirements for the packaging of furniture. It is a basic standard, which means that it supplies common rules intended to serve furniture of various kinds instead of one particular item. The subject is the package in which furniture is held for storage and carriage to the buyer, and the document is organised around that package. Its title, General requirements for furniture package, marks the scope: general rules for furniture packaging, with nothing added about any specific type of furniture.

Furniture makers, packaging suppliers, retailers, logistics companies and quality inspectors are the people who would refer to it. It is a voluntary standard, as the /T in its code indicates. The Ministry of Industry and Information Technology issued it on 13 February 2026, and it takes effect on 1 September 2026. It replaces the 2013 edition, QB/T 4465-2013.
