What this standard covers

This standard specifies the sensory requirements and physicochemical indicators of sodium gluconate, describes the corresponding test methods, and specifies the inspection rules, marking, packaging, transportation, and storage. It provides information on the molecular formula, relative molecular weight, and structural formula, as well as product classification. This standard applies to the production, inspection, and sale of sodium gluconate produced primarily from starch, starchy substances, or glucose through enzymatic, biological, or catalytic oxidation methods.

Document data

International classification (ICS): 67.180.20.

Chinese classification (CCS): X69.

Estimated length of the Chinese original: 9,993 words.

Supersedes the earlier edition QB/T 4484-2013.
