What this standard covers

This standard specifies the requirements, inspection rules, marking, packaging, transportation and storage of commercial induction cookers, and describes the corresponding test methods. This standard applies to the production, inspection and sale of commercial induction cookers (stoves) that are not exclusively for home use, with a rated voltage of single-phase appliances not exceeding 250V, other appliances not exceeding 480V, and a single heating unit rated input power not exceeding 35kW. This standard also applies to the electromagnetic heating part of combined appliances that utilize other forms of energy or other heating methods. This standard does not apply to: household induction cookers; induction cookers designed for industrial use; induction cookers used in places with corrosive or explosive air (dust, steam or combustible gas) and other special conditions.
