What this standard covers

This standard specifies the requirements for drying performance, drying efficiency, unit energy efficiency, sterilization performance, and mite removal performance of electric warm air dryers for household and similar purposes, describes the corresponding test methods, specifies inspection rules and marking, packaging, transportation and storage contents, and gives classifications and specifications for technical regulations. This standard applies to the production, inspection and sales of dryers (such as electric warm air dryers, bedding dryers, shoe dryers, and drying boxes) with a rated voltage of less than 250V and used by non-professionals in homes, shops, schools and other similar places. For other appliances that have the function of drying clothes and bedding by warm air and drying shoes by placing the air outlet inside the shoes, the detection of their drying functions is used as a reference. This standard does not apply to the production, inspection and sales of drum/pulsator dryers and clothing care machines.

Document data

International classification (ICS): 97.060.

Chinese classification (CCS): Y62.

Estimated length of the Chinese original: 22,275 words.
