What this standard covers

This standard specifies the normal operating environment, electrical safety, electromagnetic compatibility, hygiene of materials and articles in contact with food, power off and standby power requirements for portable electric ovens used in household and similar applications. It describes the corresponding test methods, specifies inspection rules, and specifies marking, packaging, transportation and storage. A classification for ease of technical specification is provided. This standard applies to the design, production, inspection and sale of portable electric ovens for household and similar applications with a rated voltage not exceeding 250V. This standard does not apply to standing electric ovens, steam ovens, or air fryers.

Document data

International classification (ICS): 97.040.20.

Chinese classification (CCS): Y63.

Estimated length of the Chinese original: 17,194 words.

Supersedes the earlier edition QB/T 4506-2013.
