What this standard covers

This standard specifies the raw and auxiliary materials, process control, and technical requirements for small-package films and bags for table salt. It describes the corresponding test methods, specifies inspection rules, marking, packaging, transportation, and storage, and provides a classification for ease of technical specification. This standard applies to the design, production, inspection, and sale of small-sized composite packaging rolls and bags for table salt, made from plastic film, paper, or aluminum foil as the base material through printing, lamination, and other processes.

Document data

International classification (ICS): 55.040.

Chinese classification (CCS): A82.

Estimated length of the Chinese original: 14,110 words.

Supersedes the earlier edition QB/T 4510-2013.
