Foreword

QB/T 4836-2026 is a recommended industry standard of the People's Republic of China in the Light Industry sector, approved and issued by the Ministry of Industry and Information Technology on 13 February 2026, with effect from 1 September 2026.

This edition replaces QB/T 4836-2015.

Classification: ICS 97.030; CCS Y61.

1 Scope

QB/T 4836-2026 covers household and similar solar photovoltaic air-conditioners. These are air-conditioning appliances for homes and comparable places that are supplied with power from solar photovoltaic panels. The document is a product standard and addresses the appliance as a whole. It does not deal with the building or the wider solar installation around it, and it limits itself to the type of product that its title describes.

Manufacturers of air conditioners and solar equipment, importers and distributors, buyers and testing laboratories are the likely readers. The standard is voluntary, indicated by the /T in its code. It was issued by the Ministry of Industry and Information Technology on 13 February 2026 and becomes effective on 1 September 2026. It replaces QB/T 4836-2015.
