What this standard covers

This standard specifies the product classification, requirements, inspection rules, marking, packaging, transportation and storage of extruded polypropylene foam sheets, and describes the corresponding test methods. This standard is applicable to polypropylene resin as the main raw material, adding a certain amount of foaming agent and a small amount of additives, and producing a single-layer foam with a cellular structure and an apparent density of 20kg/m³ to 500kg/m³ through extrusion molding. Production, inspection and sales of foam sheets. This standard does not apply to composite sheets and cross-linked polypropylene foam materials composed of polypropylene and other materials.

Document data

International classification (ICS): 83.100.

Chinese classification (CCS): G32.
