What this standard covers

This standard specifies the determination of waste paper deinking efficiency terms and definitions, principles, sampling, measurement sample preparation, the effective residual ink concentration measurement, the brightness, the results of the test report and presentation. This standard applies to the determination of waste paper pulp production line deinking efficiency of deinking equipment or production processes.

Document data

International classification (ICS): 85.01.

Chinese classification (CCS): Y30.

Estimated length of the Chinese original: 9,931 words.
