What this standard covers

This standard specifies the terms and definitions, models, technical requirements, error requirements, test conditions and methods, inspection rules, marking, packaging, transportation and storage requirements for weighing high temperature sensors. This standard applies to the working temperature of the upper limit of not less than 100 ° resistance strain gauge load cell, which weighs high temperature sensors, hereinafter referred to as sensors. Other principles and types of sensors can refer to the implementation.

Document data

International classification (ICS): 17.060.

Chinese classification (CCS): N13.

Estimated length of the Chinese original: 27,288 words.

Adopted international standard: OLML R60-2000, NEQ.
