What this standard covers

This standard specifies the general requirements, appearance, safety, emitter operating voltage, input power, negative ion concentration, durability and other requirements for negative ion generators for household and similar electrical appliances, describes the corresponding test methods, and stipulates inspection rules, markings , packaging, transportation and storage contents. This standard applies to the design, production, inspection and sales of negative ion generators or negative ion generator products used alone for household and similar electrical appliances with a single-phase rated input voltage not exceeding 250V and other rated input voltages not exceeding 480V.

Document data

International classification (ICS): 97.080.

Chinese classification (CCS): Y62.

Estimated length of the Chinese original: 23,292 words.
