What this standard covers

This standard specifies the polarity, requirements, data collection and calculation methods for the clean production technology process of polyurethane synthetic leather (hereinafter referred to as "synthetic leather"). This standard applies to the design and implementation of cleaner production processes for synthetic leather enterprises using dry, wet, and post-treatment production processes.

Document data

International classification (ICS): 59.080.40.

Chinese classification (CCS): Y47.

Estimated length of the Chinese original: 7,799 words.
