What this standard covers

This standard specifies the terms and definitions, type, metering requirements, general technical requirements, test methods, inspection rules and marking, packaging, transportation and storage of dosing scales. This standard is applicable to the use of gravity principle, in a continuous measurement to determine the cumulative mass of the material through the bulk, and set the unit time or unit length of the quality of the target value of the material through the dynamic flow adjustment, And comes with the conveyor system of the whole type of electronic belt scale. This standard does not apply to electronic belt scales that are quantitatively controlled by the total mass of the material.

Document data

International classification (ICS): 17.100.

Chinese classification (CCS): N13.

Estimated length of the Chinese original: 43,444 words.

Adopted international standard: OIML R50-1-1997(E), MOD.
