What this standard covers

This standard specifies the requirements of the technical requirements and test methods of the pole. This standard applies to top-mounted poles and cantilever-mounted poles up to 20m in height and mounted perpendicular to the mounting surface. This standard does not limit the material and actual appearance or shape of the pole or cantilever. This standard only covers single-pole light poles for road lighting, and multi-column light poles are not included. This standard does not involve passive safety under vehicle impact. The relevant requirements can be found in EN 12767.

Document data

International classification (ICS): 29.140.40.
