What this standard covers

This standard specifies the classification, marking, requirements, test methods, inspection rules, marks, packaging, transportation and storage of extruded polystyrene extruded foamed wire (commonly known as the PS line in the industry). This standard applies to decorative wire products produced from recycled polystyrene through a low-foam extrusion process, such as for the production of picture frames, photo frames, picture frames, corner lines, vertices, window lines, and door pockets.

Document data

International classification (ICS): 83.140.99.

Chinese classification (CCS): Y28.

Estimated length of the Chinese original: 8,830 words.
