What this standard covers

This standard specifies the product classification, requirements, test methods, inspection rules and signs, packaging, transportation and storage of the test screw. This standard applies to low-voltage test screw screwdrivers that assist in the detection of unipolar to earth voltages of not more than 500 V AC and DC, hereinafter referred to as "measuring electrical appliances."

Document data

International classification (ICS): 25.140.30.

Chinese classification (CCS): J47.

Estimated length of the Chinese original: 10,192 words.
