What this standard covers

This standard specifies the classification and marking, specifications, requirements, test methods, inspection rules and signs, packaging, transportation, and storage of extruded polystyrene foam (XPS) for geotechnical engineering. This standard applies to extrusive polystyrene foam for geotechnical applications. Geotechnical applications include railway and highway embankments, airport runways, aprons, and river channels.

Document data

International classification (ICS): 83.100.

Chinese classification (CCS): G32.

Estimated length of the Chinese original: 7,749 words.
