What this standard covers

This standard specifies the terms and definitions, requirements and test methods for electrostatic dust collectors in air purifiers. Note: The electrostatic filter does not include primary filter, medium efficiency filter, high efficiency filter, etc. that can be installed in front of or behind the filter module in the air purifier, and does not include additional devices such as activated carbon that need to be replaced periodically. The following products can be implemented with reference to this standard:--Electrostatic filter for fresh air system;--Special electrostatic filter for air use equipment for other purposes and places.
