What this standard covers

This standard specifies the materials, classification, requirements, test methods, inspection rules, marking, packaging, transportation and storage of plastic modules for rainwater storage tanks. This standard is applicable to the hollow structure rainwater module which is injection-molded with polypropylene resin as the main raw material. The top cover of the assembled rainwater reservoir is between 0.5m and 4.0m, and the buried depth of the bottom of the pool is not more than 7.5m.

Document data

International classification (ICS): 83.140.

Chinese classification (CCS): G33.

Estimated length of the Chinese original: 8,816 words.
