What this standard covers

This standard specifies the terms and definitions of ink rubbing fastness test methods, proof preparation and conditions, equipment and materials, inspection conditions, inspection procedures, evaluation and precautions. This standard is applicable to the test of the rubbing fastness of lithographic inks, gravure inks and flexographic inks printed on paper, cardboard, plastic film and other substrates. Other printing inks and varnishes for use on flat substrates can be referred to this standard.

Document data

International classification (ICS): 87.080.

Chinese classification (CCS): A17.

Estimated length of the Chinese original: 13,184 words.
