What this standard covers

This standard specifies the terms and definitions, classification and nomenclature, requirements, test methods, inspection rules, marking, packaging, transportation and storage of household steam sterilizers. This standard applies to household and similar steam sterilizers (hereinafter referred to as "sterilizers") whose rated voltage does not exceed 250V for single-phase appliances and are mainly used for sterilizing baby bottles, tableware, etc. This standard does not apply to steam sterilizers that have pressure vessels and generate cooking pressure. This standard does not apply to special purposes such as medical devices.

Document data

International classification (ICS): 97.040.50.

Chinese classification (CCS): Y68.

Estimated length of the Chinese original: 10,182 words.
