What this standard covers

This standard specifies the terms and definitions, technical requirements, evaluation methods, signs and instructions for washing machines with sleeve (tub) self-cleaning function. This standard applies to household and similar washing machines with sleeve (tub) self-cleaning function. Washing machines with the self-cleaning function of the sleeve (tub) include: 1. The manufacturer declares that the sleeve (tub) has a "self-cleaning" and other similar functions; 2. The manufacturer declares that the sleeve (tub) has "no-clean" or "No Stain" and other similar functions of the washing machine. For washing machines that declare that they have the self-cleaning function of the barrel, the manufacturer shall provide a prototype with a removable inner barrel (tub) for the test of this standard. If the manufacturer cannot provide a prototype of the detachable inner cylinder (barrel), it should prove the self-cleaning function of the sleeve of the product by itself.

Document data

International classification (ICS): 97.060.

Chinese classification (CCS): Y62.

Estimated length of the Chinese original: 9,970 words.
