What this standard covers

This standard specifies the terms and definitions, raw and auxiliary material requirements, technical requirements, production and processing procedures, test methods, inspection rules, and marking, packaging, transportation and storage of raw wet flour products. This standard applies to raw and wet flour products of various shapes made by machine or by hand, using wheat flour and/or other grain flour and water as the main raw materials, with or without auxiliary materials. This standard does not apply to raw and dry flour products, fermented flour products and rice flour products.
