What this standard covers

This standard specifies the terms and definitions, index selection principles, evaluation requirements, green design product evaluation report requirements and evaluation methods for the evaluation of green design products for household refrigerators (hereinafter referred to as "refrigerators"). This standard applies to motor-driven compression, household refrigerators (including 500L and above), wine storage cabinets, and embedded refrigeration appliances. This standard does not apply to other refrigerator products dedicated to transparent door display or other special purposes.

Document data

International classification (ICS): 97.030.

Chinese classification (CCS): Y60.

Estimated length of the Chinese original: 13,154 words.
